Last mechanism comparison and frozen recipe

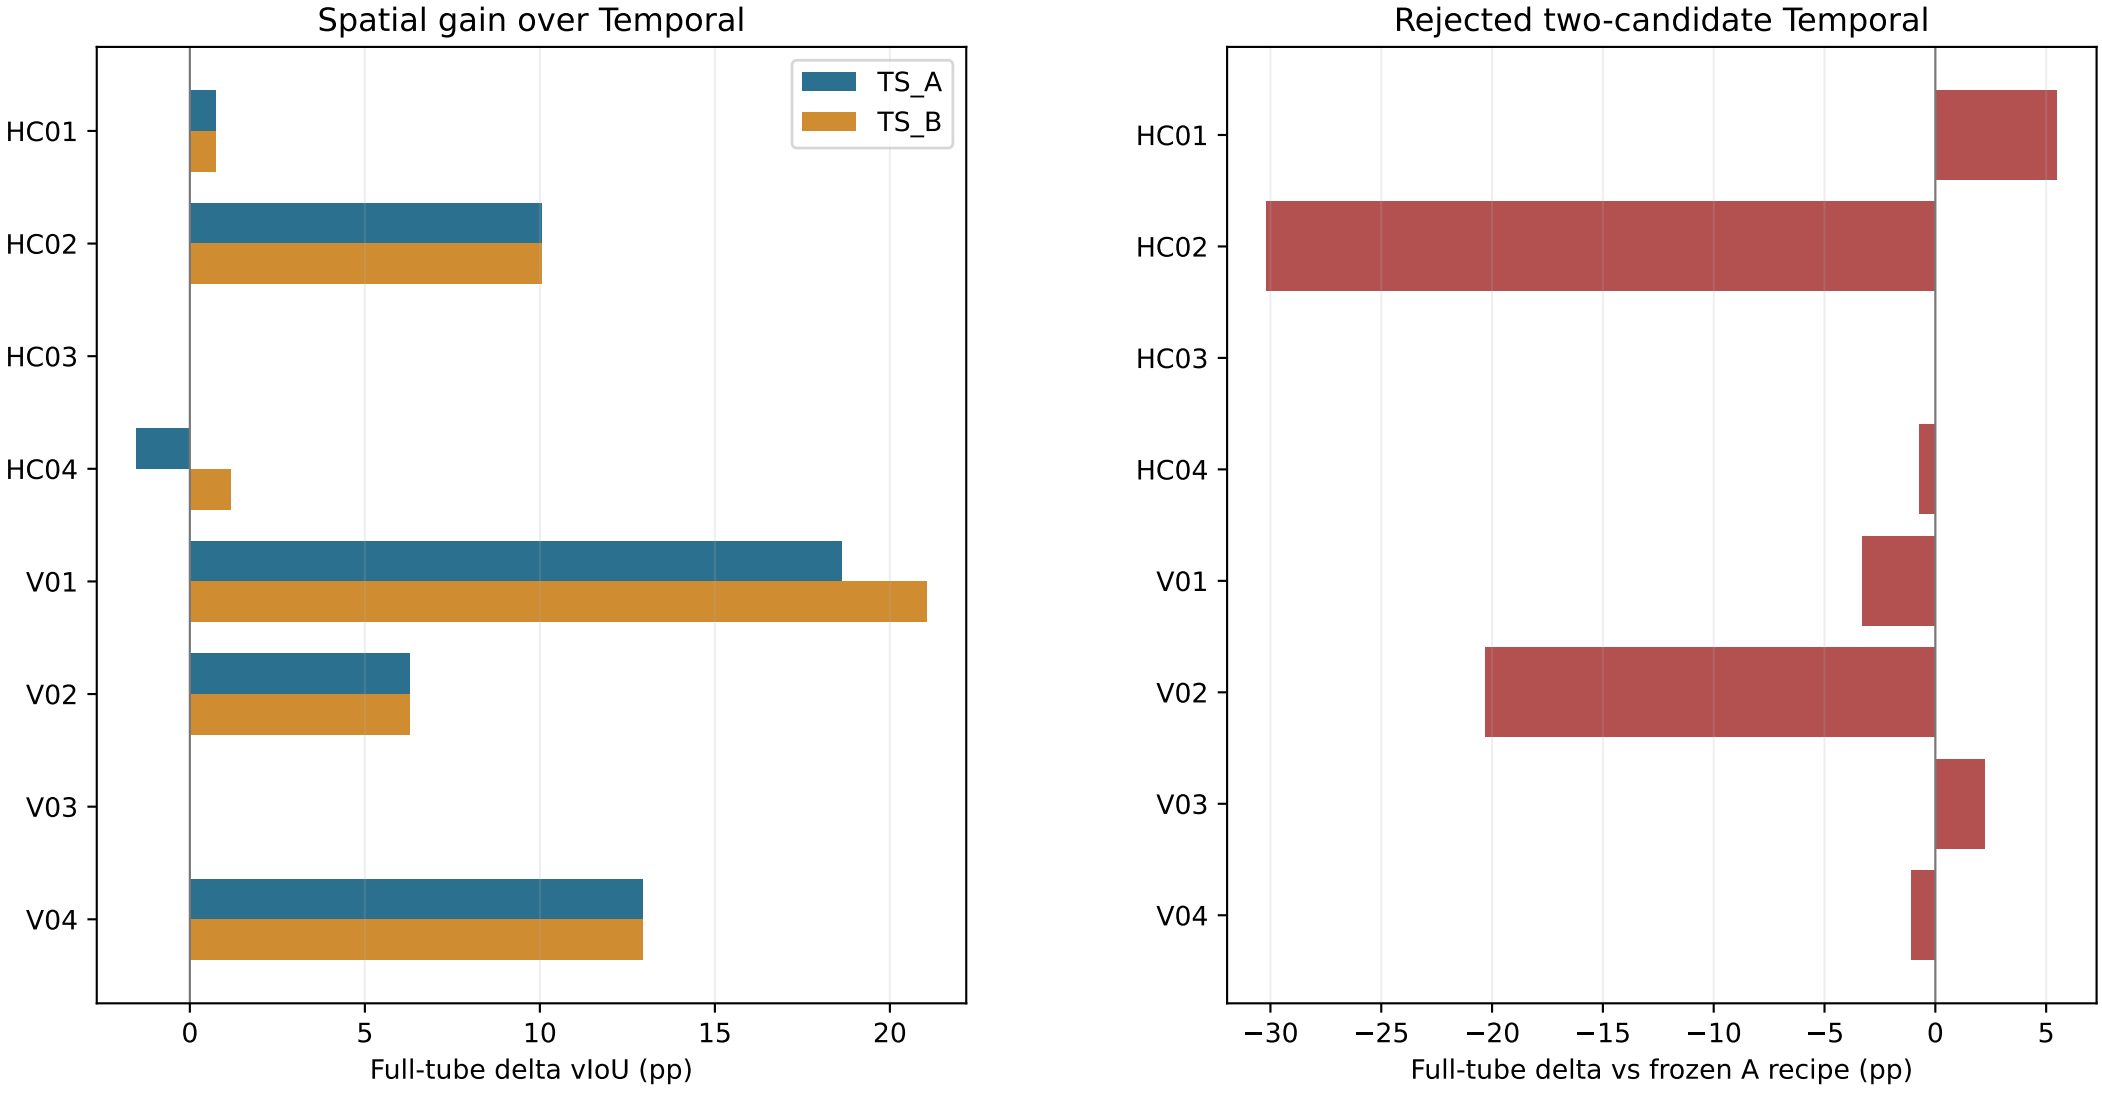
Declared arm	HC vIoU (%)	Vid vIoU (%)
Frozen	22.210	14.490
Temporal QA	31.286	22.442
Original Spatial	21.840	21.291
Temporal + Original Spatial	32.436	31.899
Spatial A (train validation)	23.840	21.291
Temporal + A [frozen recipe]	33.601	31.899
Spatial B (cross-frame)	24.321	21.732
Temporal + B	34.276	32.508
Two-candidate Temporal	27.255	18.265
Two-candidate Temporal + A	27.244	26.287
Temporal + Teacher Geometry	36.410	34.788
Two-candidate + Geometry	35.576	27.694

A selected before new GT: B failed HC teacher-reference non-degradation.

B has higher development vIoU; selection is not changed after scoring.

Eight exposed development sources. Full official Table 1 remains a separate execution phase.

All eight cases: gains and losses retained



Cross-frame agreement does not certify semantic identity or generalization.

Fast deletion loses 6.36 / 5.61 pp: retain four candidates; optimize exact execution instead.
